Great Easton Recreation Ground

The cavalry has arrived and the group of volunteers has a new look and energy about it. Brian Frisby has lead the charge and through his contacts in the village and cajoling the neighbourhood through notices in the parish magazine there has been an audible buzz through the back lanes of Great Easton. We've been very fortunate to have Graham Pound join us who has got to the bottom of the eccentricities of the sit on mower and the new volunteers are being trained up as their rota slots arrive. The bank balance still remains healthy with 20k on deposit and the current account around the 5k mark for day to day running.

I'd like to thank Mark Haynes for his sterling years of service as our Treasure, also, Phil Beech, James Morrison, Chris Page and Neil Mckay for all the time they've put in over the years.

The recent Rospa report has highlighted a number of areas to look at, these have been assessed and do not pose any immediate threat. A quote was sort from the original installers which naturally is eye wateringly high and we will look to alternatives later on in the year.

I will be standing down as Chair, but continue on the rota, once the team and equipment are once again shining examples of the village.

Charlie Jefferson
